Dear JC Systems/Ideal Aerosmith Customers,

I would like to take this opportunity to introduce our company to you and to inform you that our company recently acquired the JC Systems 600A/620A product line from Ideal Aerosmith.

TMC Services, Inc has been manufacturing its own line of industrial controllers (Micristar product line) for 10 years and servicing the industrial controls market for 15 years.

We are very excited about the purchase of the JC Systems product line and we feel it complements not just the business we specialize in, it also expands our product base which enables us to offer two quality, well known, controllers to our customers.

Please visit either one of our websites; the JC Systems website at [www.jcsystemsinc.com](http://www.jcsystemsinc.com) or the TMC Services website at [www.tmcservices.net](http://www.tmcservices.net) that features the Micristar product line and the services that we provide.

At TMC Services, we believe we understand what our customers expect from us, which allows us to provide a reliable, quality product that is backed by our exceptional customer service and support.

We thank you for your interest in our controllers and we look forward to assisting you in any way we can.

Best Regards,

Thomas Corder
